AUSTRALIAN THREATENED SPECIES

The Southern Cassowary is found in far north Queensland's tropical rainforest, melaleuca swamps and mangrove forests.

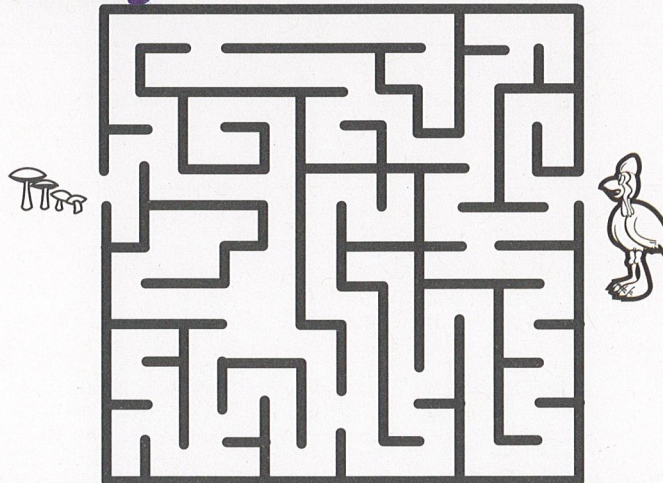

The Cassowary is an important forest gardener, spreading the seeds of rainforest trees in their dung. The Cassowary is endangered due to habitat loss, attacks by feral animals, and road accidents. Please help to save Australia's Cassowaries.

can you draw a cassowary?

can you find your way through the maze?

DID YOU KNOW !!!

- > cassowaries are excellent swimmers.
- > cassowaries can live for 60 years.
